EXPERIENCE

Full-Stack Developer – RegalRinse (Internship)

Jul 2025 – Sep 2025

- Architected and deployed a full-stack e-commerce platform using React, Node.js, TypeScript, Redux, Tailwind CSS, and MongoDB, applying responsive design principles for a seamless cross-device experience.
- Integrated Razorpay through secure API integration for real-time payment processing and developed a robust admin dashboard featuring analytics, order management, and real-time delivery tracking for end-to-end operational visibility.
- Designed a personalized recommendation engine using collaborative filtering and product metadata to improve user engagement.

Junior Software Engineer – Blockcube (Full Time)

October 2025 – June 2026

- Delivered scalable RESTful APIs and backend services for the Urjmitra energy-management platform using Node.js, Express.js, and PostgreSQL, applying database design and optimization practices to enable efficient handling of real-time data.
- Built a dynamic dashboard system with a React frontend, ensuring seamless API communication, real-time updates, and optimized performance.
- Maintained an existing role-based access control (RBAC) system, integrating APIs and enforcing authentication and authorization across hierarchical permissions and application modules.
- Collaborated with developers using Git-based version control and code review workflows within an Agile SDLC, debugging and shipping reliable backend features.

PROJECTS

STORE MANAGEMENT SYSTEM – Full-Stack Multi-Role E-commerce Platform

Tech Stack: React · Vite · Node.js · Express.js · PostgreSQL · Sequelize · Redux Toolkit · Tailwind CSS · JWT · Cloudinary · Render · Vercel

- Built a full-stack multi-role store management platform with **JWT authentication**, **role-based access control (RBAC)**, and fine-grained permission management for Admin, Product Lister, and Customer roles.
- Developed scalable REST APIs for employee management, product variants, categories, inventory, and order lifecycle, including automatic SKU generation and Cloudinary-powered multi-image uploads.
- Designed responsive Admin and Customer interfaces with React, Redux Toolkit, and Tailwind CSS, implementing protected routes, permission-based UI rendering, and production deployment on Render and Vercel.

EXPENSE TRACKER – Full-Stack Personal Finance Platform

Tech Stack: PostgreSQL · Express · React · Node.js · Sequelize · Tailwind CSS · JWT · Neon · Render · Vercel

- Established a full-stack expense management platform with Sequelize and PostgreSQL, featuring JWT authentication, budgets, categories, and CRUD operations for financial records.
- Automated a bank CSV import pipeline with income/expense categorization and duplicate-detection logic to streamline data entry.
- Optimized dashboard analytics and month/year filtering with report views over relational data models to surface spending insights.
- Deployed the application in a live production environment across Neon (database), Render (backend), and Vercel (frontend).

PROGRAMMING SKILLS

- Languages:** JavaScript, TypeScript, Python, SQL
- Frontend:** React.js, Redux, HTML, CSS, Tailwind CSS, Shadcn/UI
- Backend:** Node.js, Express.js, REST APIs, JWT Authentication, RBAC
- Databases:** MongoDB, PostgreSQL, Sequelize
- Tools & Platforms:** Git, GitHub, VS Code, Postman, Razorpay, Render, Vercel, Neon, Vite

EDUCATION

Guru Gobind Singh Indraprastha University

Bachelor of Technology in Computer Science (Currently in 7th semester) | CGPA: **8.77**

New Delhi, Delhi

Aug 2023 - Sep 2027
